Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 30 are indefinite because the scope of the term "about" is unknown. The term is a relative term, which renders the claim indefinite. The term is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maloney (people.cornell.edu/page/bjm10/blort/Drake.htm) for the reason set forth in the last Office Action.

Response to Arguments

Applicant's arguments filed 03/22/03 have been fully considered but they are not persuasive.

Applicants have amended their claims to recite that the hot wort is has a temperature of at least about 145 F. They argue that the cited art, Maloney, does not teach this limitation.

Maloney teaches that, beginning as early as the 16th century, "wort would be cleared with the aid of oak boughs added to steep for a time and removed before the boil." (Bottom of page 1). The term "steep" is a well known term in the food art. The Master Dictionary of Food & Wine defines "steep" as "cover with boiling liquid and let stand to extract flavors and colors." Page 384.

Further, wort is the liquid that is separated from the mash. Typical mashing temperatures are at the claimed temperature. It would make no sense to cool the fresh wort in order to "steep" the oak and then boil the wort after removing the oak. Clearly, based on the common sense interpretation of Maloney, the temperature at which the oak is added is at the claimed temperatures.

It is also noted that while applicants argue that "the wort is at best lukewarm." Applicants provide no support for this argument other than the oak is added prior to boiling, i.e., 212 F. Rather, a common sense interpretation would be that as set forth above.

Applicants also argue that Maloney does not teach adding the oak for flavor purposes. In response to applicant's argument, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for

patentability when the differences would otherwise be obvious. See *Ex parte Ohiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

Lastly, applicants assert that the instant invention provides for unexpected results. No evidence has yet been presented that discloses unexpected results. Therefore the rejection is maintained.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
